-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The present Office action is in response to Continued Prosecution Application (CPA) requested under 37 C.F.R. § 1.53 (d). Applicants request for filing a Divisional application.
2. Claims 16-43 are pending in the application.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121: Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

- I. Claims 16-28, drawn to a method for enabling a proprietary or standardized medical system, classified in class 705, subclass 3.
- II. Claims 29-34, drawn to a medical image processing network, classified in class 709, subclasses 203.
- III. Claims 35-43, drawn to a removable medium recording station, classified in class 710, subclass 62.

4. The inventions are distinct, each from the other because of the following reasons: Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 2182

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the groups of claims recite a method for enabling a medical system (I) and a removable medium recording station (III). The subcombination has separate utility, such as providing a storage system allowing communication between different computer workstations.

5. Inventions II and I or III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions (I and III) and (II) are directed to different fields. Invention II is directed toward a processing network system. Inventions I and III are oriented to a method for a medical system and a removable medium recording station, which does not include a processing network.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

7. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2182

8. Because these inventions are distinct for the reasons given above and the search required for Groups 705 and 709 is not required for Group 710, restriction for examination purposes as indicated is proper.
